## SIGG CO-BRANDING

For more than 100 years, the name SIGG has stood for high-quality products with unmistakable design and outstanding quality. Make the SIGG bottle an ambassador of Swiss precision for your company.

We are pleased to present the range of SIGG Co-Branding in this catalogue.

Minimum order quantities and delivery times vary from product to product. We would be happy to provide you with information on minimum order quantities and delivery times.

### ABOUT SIGG

## SIGG CORE VALUES

### SWISSNESS

---

SIGG is famous internationally thanks to its long history of successful products and is held in high esteem as THE ORIGINAL – in both senses of the word: SIGG bottles are authentic and genuine, creative and original. Their functional design and high quality standards mean they are completely outstanding. All aluminium bottles are manufactured in the company's own production facility in Switzerland.

### QUALITY & PRECISION

---

All SIGG bottles are high-quality products made with strong dedication to precision and great attention to detail.

### INNOVATION

---

Each year SIGG launches a new range of products featuring plenty of functionality and new materials.

### DESIGN

---

SIGG's iconic design is internationally renowned and has won various design awards. It has been given a permanent place in New York's Museum of Modern Art (MoMa).

### SUSTAINABILITY

---

SIGG products are reusable, easy to clean and recyclable. Raw materials used by SIGG are free of BPA, phthalates and other harmful substances. SIGG produces bottles in Switzerland with the overarching goal of keeping its environmental impact as low as possible. Thanks to innovative solutions, it has been able to reduce its ecological footprint further and further. SIGG currently uses more than 55 percent energy from renewable sources in its bottle production. The small amount of waste from production is recycled at a rate of 99 percent, and the water used to clean the bottles is collected in a closed system and recycled.

Thanks to the longevity of its high-quality and reusable aluminium bottles, SIGG products have a significantly better CO<sub>2</sub> balance than disposable PET bottles. Our entire collection of aluminum products is ClimatePartner certified.

# SIGG QUALITY FEATURES

Environmental awareness is at the heart of our vision, our values and our corporate identity. SIGG is constantly trying to reduce its carbon dioxide emissions, uses FSC-certified materials and also boasts a material with ISCC certification in the shape of Tritan Renew.

## 100% RECYCLED ALUMINIUM

### PCR aluminium

To further reduce the carbon footprint of our company, we decided to switch to PCR aluminium for our entire aluminium bottle collection. All of our aluminium bottles are made from 100% recycled material.

### PCR stainless steel

Since the summer of 2023, the production of all stainless steel products now includes 90% recycled stainless steel material. This reduces the CO<sub>2</sub> footprint of these products by at least 20% on average, compared to similar products made from primary materials.

ClimatePartner  
certified product  
[climate-id.com/4A8NLQ](https://climate-id.com/4A8NLQ)

### ClimatePartner

We are constantly trying to reduce our company's CO<sub>2</sub> emissions. To this end, we are committed to a climate strategy consisting of five steps. Our entire aluminum bottle collection consists of products made with reduced CO<sub>2</sub> emissions.

### FSC

All of our catalogues are printed on FSC®-certified paper.

### ISCC

SIGG is the first Swiss company in the industry for reusable drinks bottles to have received ISCC certification, which it obtained for the material Tritan Renew.

# ALUMINIUM

TRAVELLER · TRAVELLER MYPLANET™ · MOVE MYPLANET™  
WMB · WMB SPORTS · WMB ONE · ORIGINAL

## ALUMINIUM

# SWISS ALUMINIUM PRODUCTION

It all starts with a piece of aluminium that's the shape of an ice hockey puck. Every puck is extruded by a 600-ton piston stroke and then flows along the piston, transforming it into a cylinder. The cylinder gets shaped into a bottle with the help of up to 26 differently shaped modules, each one moving the metal further towards the final shape. Once the bottle has the iconic form that we all know, the next step is to coat the inside of the bottle with our polyester liner to avoid direct contact between the liquids and the aluminium. Once the shape and the inside of the bottle are ready, we paint or engrave the

outside with the desired colour and design using the screen-printing method. The lid is added, and a manual quality check ensures that all bottles leaving the production line are in perfect condition.

## ALUMINIUM

# SUSTAINABILITY

At SIGG long tradition of sustainability dates back to the very first aluminum bottle and continues to this day with innovative ecological products and projects. For us sustainability is an ongoing process that requires continuous motion, determination and progress. We think about tomorrow and act today by developing products and supporting projects that promote sustainability.

# SELECT TYPE AND SIZE

Each SIGG bottle represents a piece of top Swiss craftsmanship circulating in the world. For over 100 years. The bottle bodies are made from a single piece of high-quality aluminium and are manufactured in Switzerland. They are especially light and robust. The highly elastic inner coating is resistant against fruit acid, is neutral in taste and is free of harmful substances such as BPA and phthalates. The bottles are available in many different colours and feature either the proven screw top, active spout or a practical wide-neck opening.

## Traveller

**Alu** Pantone 877 C 901.820 

# DECIDE BETWEEN SCREEN PRINTING ...

Our commitment to outstanding quality extends beyond the manufacturing of our bottles, it includes the printing process as well. SIGG has been using the screen printing method for years. It delivers strikingly clear print colours with lasting brightness. We can print your bottle with up to six colours. The result: an outstanding advertising medium for your brand.

Individual screen printing starting from 120 pieces.

Sequence of print colours on a 6-colour bottle:

# DIGITAL PRINTING ...

Digital printing allows SIGG products to be customized with multi-colored designs, including seamless 360° printing for impressive visual effects. Photo-realistic prints with brilliant colors and smooth gradients offer high color durability and a wide range of shades. Additionally, digital printing is flexible and can be applied to small quantities, starting from just 120 pieces.

Individual digital printing starting from 120 pieces.

# ... AND ENGRAVING.

Custom engraving is a high-quality way to decorate SIGG products discreetly for your brand. Various possibilities are available for different products. Individual engravings on the bottle body or elegantly and finely on the lid.

Laser engraving from stock collection from as little as 60 pieces.

# ORIGINAL PRINT & ENGRAVE

Made of aluminium and is indestructible – the classic SIGG drinking bottles are also available with a wider opening and a high-quality metal closure. This allows the SIGG bottle to be filled and cleaned more easily. The body is made of a single piece of high-quality aluminium and is manufactured in Switzerland. It is especially light and robust. The bottle even remains leak-proof with carbonated drinks. The highly elastic inner coating is resistant against fruit acids, is neutral in taste, and is free of harmful substances such as BPA and phthalates.

FOOD CONTAINERS

## GEMSTONE FOOD BOX & JAR PRINT & ENGRAVE

The collection is supplemented by our food containers. SIGG offers Gemstone Food Jars made of stainless steel, which keeps food hot or cold for hours. The elegant design shines in urban and rural environments. The lunch box from our Gemstone collection is made of stainless steel, which means it is as resistant and durable as stone and as timeless as a gemstone. Take your lunch or a snack along in our customisable boxes or food jars. All materials are free from harmful substances. The inserted silicone sealing ring ensures that the box is water tight and leak free.

## SHIELD THERM ONE PRINT & ENGRAVE

The Shield Therm ONE drinking bottle could (literally) be our coolest bottle ever. Thanks to the mouthpiece, which is designed for an ideal flow, and the ONE top closure, which can be easily opened and closed one-handed, it offers the perfect drinking experience. The vacuum-insulated, copper-coated, double-wall construction keeps drinks cold for an incredible 72 hours. It doesn't get much cooler than that. Naturally, its insulating properties also make it perfectly suitable for hot drinks. The product consists of 90% post-consumer recycled stainless steel.

# GEMSTONE IBT & SLIM PRINT & ENGRAVE

The Gemstone Collection is made of double-walled stainless steel which keeps the content hot or cold for a long time. The flasks have an ultra-thin inner body made using a special spinning technology, so they weigh 30% less. Thanks to high-precision welding, the vacuum gap inside the bottle has been reduced to a minimum. This results in a smaller bottle size compared to standard bottles with identical volume.

# NESO CUP PRINT & ENGRAVE

Noble Pure Ceram coating, modern design and genuine drinking experience. The Neso cup is the 'Best of all worlds'. Made of 18/8 stainless steel and coated with Pure Ceram layer on the inner and outer wall, it preserves the natural taste and smell of all hot or cold drinks. Thanks to the vacuum insulated, copper coated double wall construction you will not burn your fingers – even with very hot drinks. The insulating effect also ensures no moisture condenses on the outer wall of the cup. Additionally, the protective lid opening minimises the risk of spillage, especially while walking.

# STELLA PRINT & ENGRAVING ON THE STAINLESS STEEL TOP ONLY

SIGG's glass bottles are the perfect addition to the SIGG collection, made with world-renowned Swiss quality. The materials are free of harmful substances, such as estrogen-active substances and phthalates. The lid can be opened with a simple twist. Pure modern drinking pleasure where you can see what you are drinking. An engraved logo on the lid makes the bottle a real eye-catcher.

## INTRODUCING THE REDESIGNED WMB ONE TOP 2

We're excited to announce the redesigned version of our popular WMB ONE Top, now called the WMB ONE Top 2. This updated lid brings noticeable enhancements in durability, functionality, and ease of use. We are gradually rolling out the WMB ONE Top 2 across all applicable products. Rest assured, the lid remains leak-proof, even with carbonated beverages.

Leak proof even with carbonated beverages

## ACCESSORIES

### Helia Straws

With the aim that disposable straws can be completely dispensed with, we offer a sustainable alternative made of robust borosilicate glass. The soft mouthpiece in various summer colors delivers the perfect drinking experience.

### Straws

Banish plastic from your life with our reusable stainless steel straws.

### Stella Pure Pouch

The decorative neoprene cover is impressive, thanks to its insulating effect and pleasant feel. It also protects the glass from damage. Available in yellow, red and gray.

### Bottle Lace

Our discreet bottle lace ensures the drinking bottle lid is not lost. Available in black and white.

### Spare Parts

As well as through their design, SIGG products impress thanks to diverse expansion options. Alongside various lid variants and neoprene and nylon bags, many replacement parts can be ordered subsequently.

### Carabiner

Fond of adventures? Whether in the mountains or in the city jungle, the SIGG Carabiner adds a special touch to your bottle.

## CLEANING

### Bottle Cleaning Tablets

The cleaning tablets help with care – simply dissolve the tablet in the bottle with water, rinse out and it's done.

### Cleaning Brush

In order to clean the SIGG drinking bottles optimally and gently, we recommend thoroughly rinsing the bottle after each use. The SIGG cleaning brush – specially shaped for SIGG drinking bottles is ideal for thorough cleaning.

### Cleaning Brush MyPlanet™

This brush will make cleaning your favorite SIGG bottles a breeze. This brush is BPA-free, made from Swiss beechwood and 100% renewable materials to ensure that it is both stylish and sustainable.

## PACKAGING

### Hang Tags

Add a very personal touch to your SIGG bottle, with your customizable tag. Send your SIGG bottle with your message on its way.

### Packs of six

Our bottles are transported in packs of six as standard and are additionally protected with paper or bags.

## GIFT BOX

Gift Box large

Gift Box small

# GIFT BOX
