

MASTER PRODUCT RANGE DOCUMENT 2026

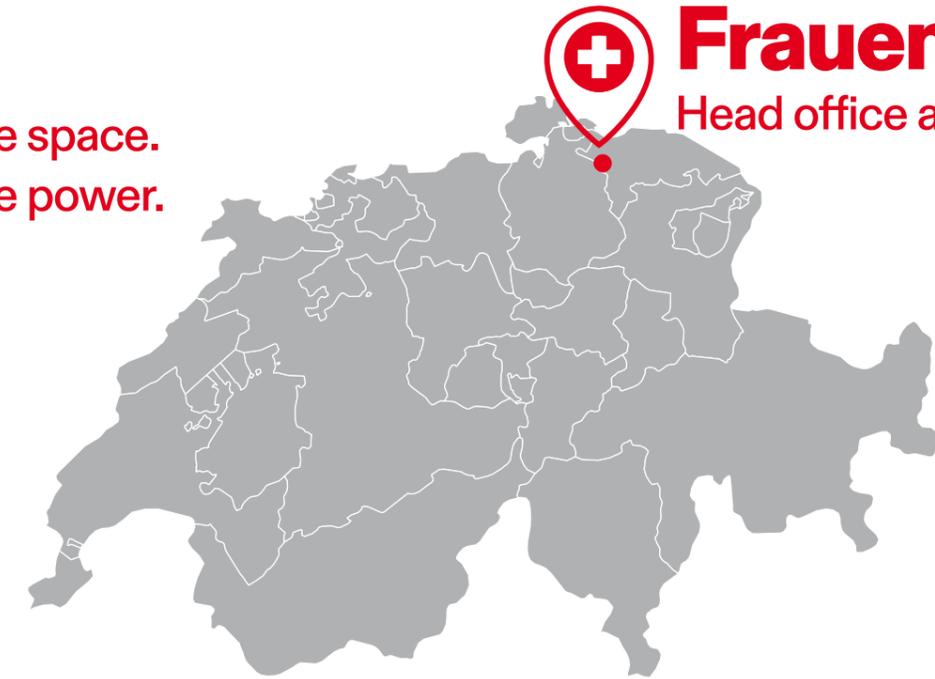

SWISS PRODUCTION, DESIGN & ENGINEERING

The source of each new bottle lies in Switzerland. This is where the ideas that become innovations are born. We never rest on our laurels. Driven by our passion to produce the best drinking bottles in the world, we are constantly working on new ideas and designs. To do this, we use results from market research and customer feedback and enrich them with our expertise and creativity.

Production at SIGG is characterized by a combination of precision and innovation. State-of-the-art production techniques ensure the high quality of SIGG products to meet the demands of our customers. **At our Frauenfeld site, all drinking bottles are made from 100 percent recycled aluminium.** We promote Switzerland as a business location, which is why we have invested several million francs in the **renovation and expansion of our production facilities** in recent years.

In order to meet various customer requirements, we also have some of our bottles manufactured at other international production sites. Quality is SIGG's top priority, no matter where in the world our bottles are produced. We guarantee that all **our products are free from all harmful substances such as BPA.**

More space.
More power.

Head office and production

Global
representation

A grey silhouette of a globe showing the continents. A red location pin with a white cross inside a red circle is placed over the European continent.

MATERIALS

Aluminium

All SIGG aluminium drinking bottles are made from 100 percent recycled aluminium in our own production facility in Frauenfeld. This particularly light metal is considered almost indestructible. The inner coating is resistant to fruit acids, taste-neutral and free of harmful pollutants. All aluminium bottles are ClimatePartner-certified, as SIGG reduces and offsets CO₂ emissions from production.

Tritan™ Renew

The patented Tritan™ plastic is entirely free of harmful pollutants such as estrogen-active substances and phthalates. The material looks like glass, but is lightweight, durable, taste-neutral and odorless, as well as dishwasher safe up to 90°C. Tritan™ Renew with 50 percent certified recycled material* is based on a revolutionary molecular recycling technology that converts single-use waste into intact, durable materials and thus reduces greenhouse gas emissions.

*The recycled content is achieved through an ISCC-certified mass balance process.

tritan™
RENEW

Stainless Steel

Our stainless steel products, including all vacuum-insulated bottles, are made from 90 percent post-consumer stainless steel. 18/8 stainless steel is durable and stands for timeless elegance. Drinking bottles made from this material also offer optimal hygienic conditions and always remain odorless. After proving reliable companions for many years, stainless steel bottles can be fully recycled.

Polypropylene

Polypropylene is a very strong and resistant plastic that is used for our VIVA ONE and Pulsar drinking bottles. The high-quality and reusable polypropylene drinking bottles are recyclable and free of harmful pollutants.

SUSTAINABILITY

« We bear responsibility — for our planet, for future generations and for what we produce every day. Sustainability is not a trend at SIGG. It is a promise. »

Environmental awareness is at the heart of our vision, our values and our corporate history. Our need to reuse excess aluminium waste was the catalyst for the development of our first reusable water bottles. Since that day, we have endeavored to offer our customers innovative and environmentally friendly products.

Production in Switzerland: Our aluminium bottles are manufactured at our plant in Frauenfeld — with

100%
renewable
energy.

Packaging with responsibility:
A large proportion of our packaging is made from recyclable paper or cardboard. Where possible, we dispense with packaging material.

Longevity instead of replacement:
Our products are designed for a long service life. Many replacement parts (e. g. tops) can be purchased.

> 3 years
of replacement
parts ensured

Recycled materials: We use recycled material for our aluminium, stainless steel and Tritan™ bottles.

43% CO₂-
reduction since 2021

Certifications and partnerships: Together with ClimatePartner, we have the carbon emissions from aluminium bottle production calculated, develop measures and offset unavoidable CO₂.

100 percent
of our aluminium products are
certified by ClimatePartner.

OUR STORY

1908

THE START OF A VISION/WHERE IT ALL BEGAN

The history of SIGG Switzerland Bottles AG begins in 1908: Ferdinand Sigg returns from years of travel and founds a factory for aluminium products with Xaver K ng. **Their shared conviction: Aluminium is the material of the future.**

Ferdinand Sigg
* 15.12.1877
† 08.02.1930

1917

SIGG MOVES TO FRAUENFELD

Just one year after starting production, the company already has 30 employees. In 1917, co-founder Xaver K ng leaves the company, and the **SIGG AG aluminium factory moves to Frauenfeld.** With the new location, the product range also grows: Pots, pans, tea cups, cutlery and bottles are added.

1980

THE BIRTH OF A CLASSIC

In 1980, SIGG launches the Traveller bottle, which has been making history ever since. Inspired by the shape of a hot-water bottle from 1961, the Traveller bottle is a pioneer among aluminium drinking bottles. Its simple, functional design and robustness make it an international classic.

1999

THE FUTURE OF THE BOTTLE

The company is realigned with the aim of securing the future of the brand. From now on, the focus is clearly on what has made SIGG famous worldwide: high-quality, reusable drinking bottles.

2004

NEW SIGG HEADQUARTERS

SIGG moves into new premises in 2004. The new office and warehouse building reflects SIGG's pioneering spirit and dynamism: The fa ade of the building is made of aluminium and the surrounding area is made of the mineral bauxite, the raw material for pure aluminium.

2024

INVESTING IN THE FUTURE

In 2024, SIGG invests several million in a modern production facility – a clear commitment to Switzerland as a business location.

With a new plant, ultra-modern facilities and sustainable technology such as heat pumps and photovoltaics, SIGG is committed to even more environmentally friendly production.

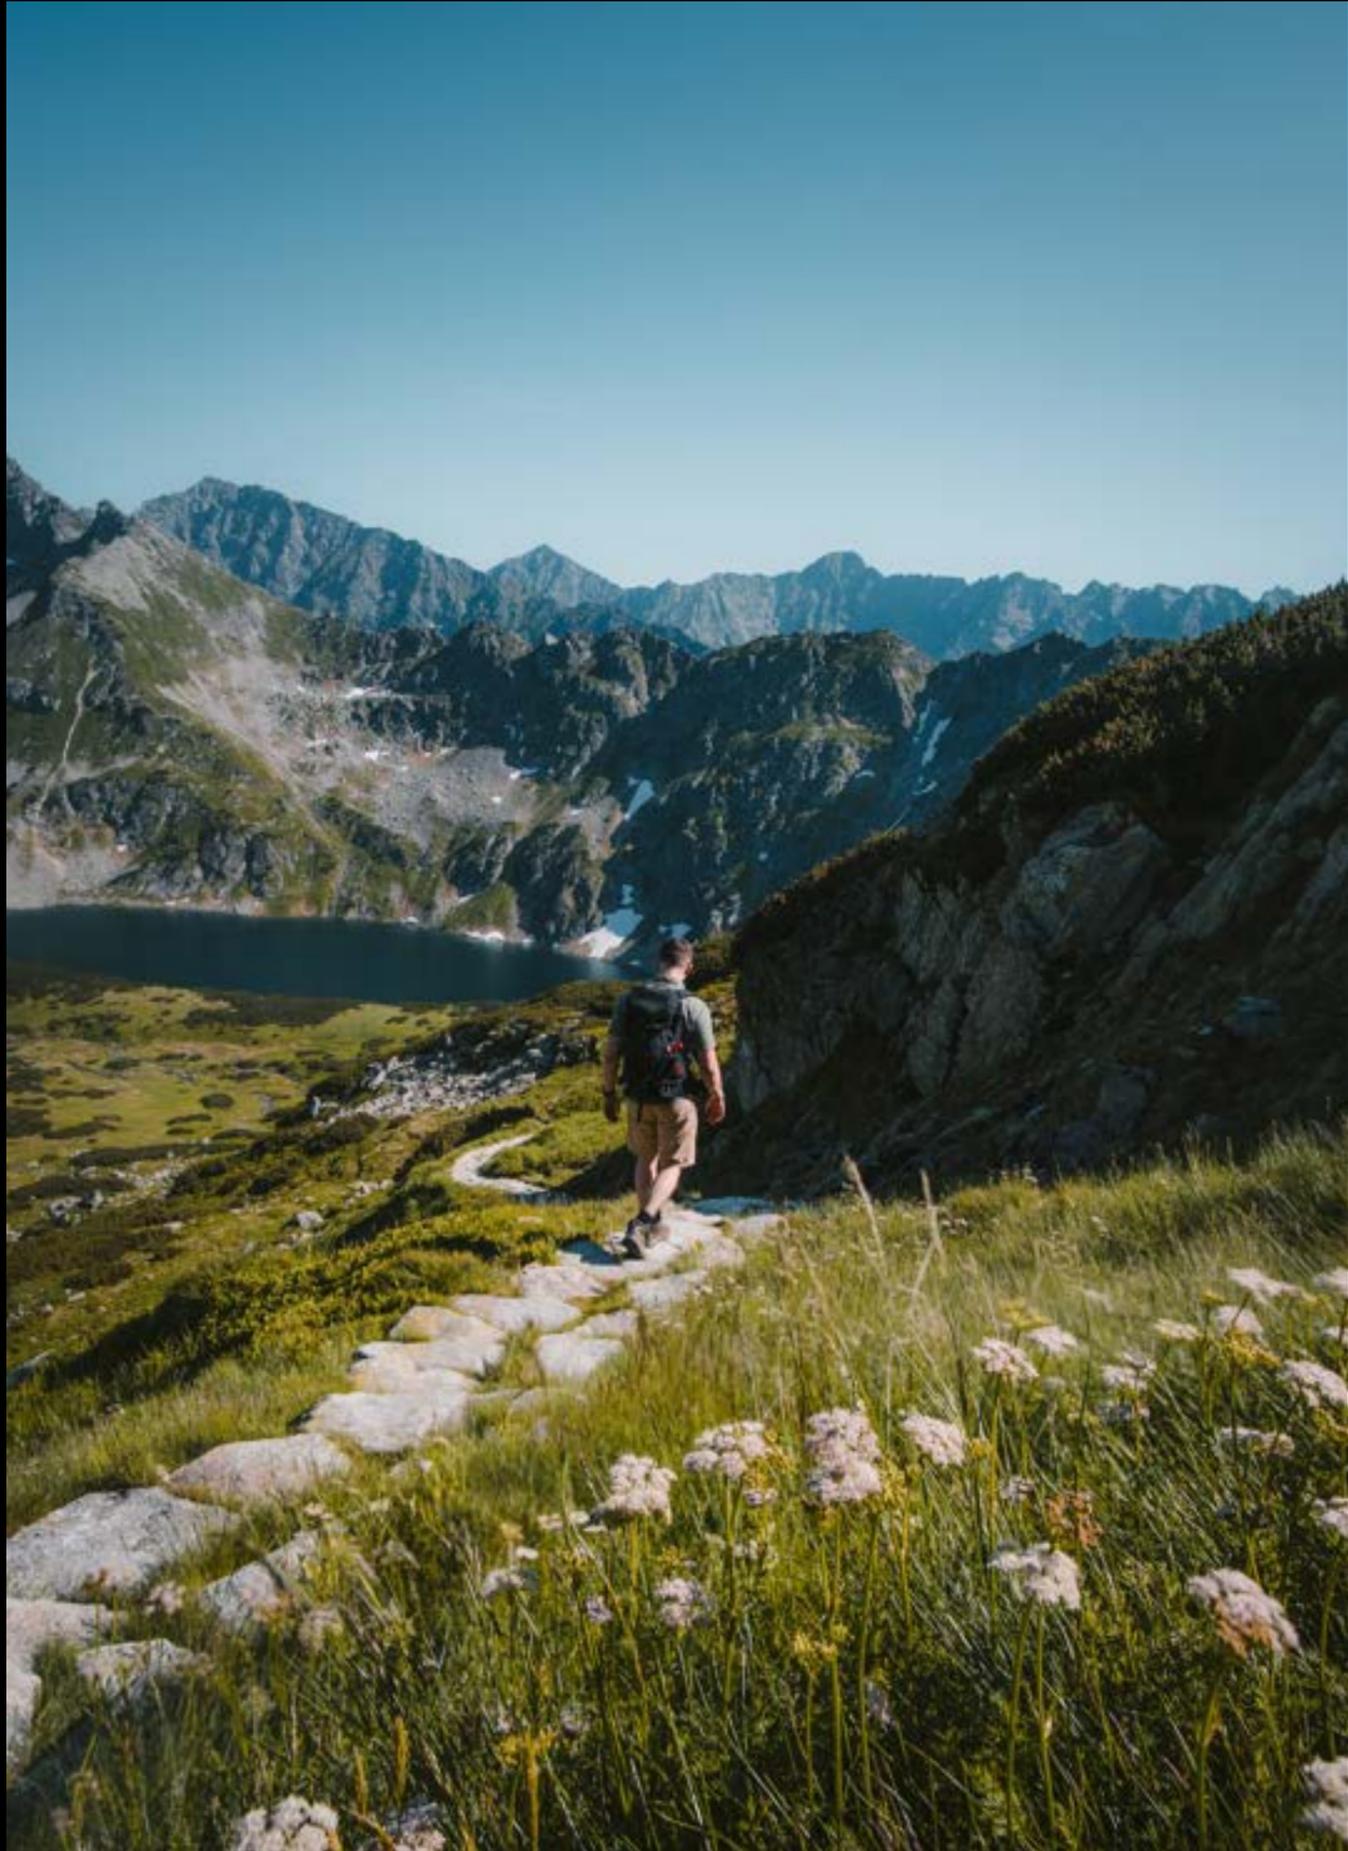

1993

DESIGN ICON MADE IN SWITZERLAND

Fresh colors, new sizes and innovative tops characterize the early 1990s. SIGG strikes a chord and is celebrated worldwide. **In 1993, three SIGG bottles are even included in the legendary Museum of Modern Art (MoMA) in New York** – a symbol of timeless design "Made in Switzerland."

**STAINLESS
STEEL**

SIGG™

SHIELD THERM ONE

The Shield Therm ONE keeps drinks cold for up to 99 hours and is also suitable for hot and carbonated drinks, is leak-proof and is easy to use with one hand.

STAINLESS STEEL

SHIELD THERM ONE

The Shield Therm ONE drinking bottle could (literally) be our coolest bottle ever. Thanks to the mouthpiece, which is designed for an ideal flow, and the ONE top closure, which can be easily opened and closed one-handed, it offers the perfect drinking experience. The vacuum-insulated, copper-coated double-walled construction keeps your favorite drinks cold for an incredible 99 hours (1.5 L). It doesn't get much cooler than that. Naturally, its insulating properties also make it perfectly suitable for hot drinks. The bottle is also available in many attractive color variants so that you can adapt it to your personal style. The Shield Therm ONE consists of 90 percent post-consumer recycled stainless steel and is the environmentally friendly alternative to plastic bottles. And like all SIGG drinking bottles, it is completely BPA-free and meets the strict EU standards for food safety. It is not only functional, but also particularly stylish, making it the ideal companion for your next outdoor adventure or a relaxed day in the city. So you always have a cool and refreshing drink to hand – or a hot drink if desired.

STAINLESS STEEL

SIGG™

ALPINE STAR

The Alpine Star is your reliable thermos flask for on the go — durable, lightweight and with strong insulating power for hot or cold drinks whenever you need them.

STAINLESS STEEL

ALPINE STAR

When your breath freezes and the wind whips your face, it is your reliable companion. The Alpine Star is the thermos flask for real adventures — lightweight, stable and made for everything that awaits you outdoors. Whether at icy heights or in rough terrain: It keeps your drink hot or cold for as long as you need it to. With its copper-coated double-walled insulation, it retains heat for up to 25 hours and cold for up to 105 hours (1.0 L) — reliably, regardless of whether you set off early in the morning in sub-zero temperatures or enjoy the magnificent mountain view in the sunshine at lunchtime. The silicone base ensures a firm grip, even when it is slippery, wet or icy. And if you need to keep your gloves on in icy temperatures, the bottle sits comfortably in your hand thanks to its anti-slip surfaces and distinctive grooves. A gentle twist of the Twist&Pour top is all it takes to get your drink flowing — directly into the integrated drinking cup. Every detail here ensures maximum drinking pleasure. That's why you have the Alpine Star, and that's why you love it.

HOT & COLD ONE LIGHT

The stainless steel Hot & Cold One bottle keeps drinks perfectly hot or cold and is ideal for on the go.

STAINLESS STEEL

HOT & COLD ONE LIGHT

The SIGG HOT & COLD ONE is practical to use with one hand and has the proven stainless steel, double-walled insulation. Thanks to the "safety lock," which keeps the top securely closed, it can be easily stowed in a bag without any worries. The top was specially developed for people who want to enjoy their favorite hot or cold drink on the go. The handle makes it easy to carry. The built-in tea filter is perfect for using tea leaves or fruit slices. It can be easily removed, making the bottle ideal for coffee too.

SIGG™

HELIA TUMBLER MUG

The Helia tumbler mug made of 18/8 stainless steel keeps drinks cold for up to 24 hours and hot for 4 hours and comes with a glass drinking straw.

STAINLESS STEEL

HELIA TUMBLER MUG

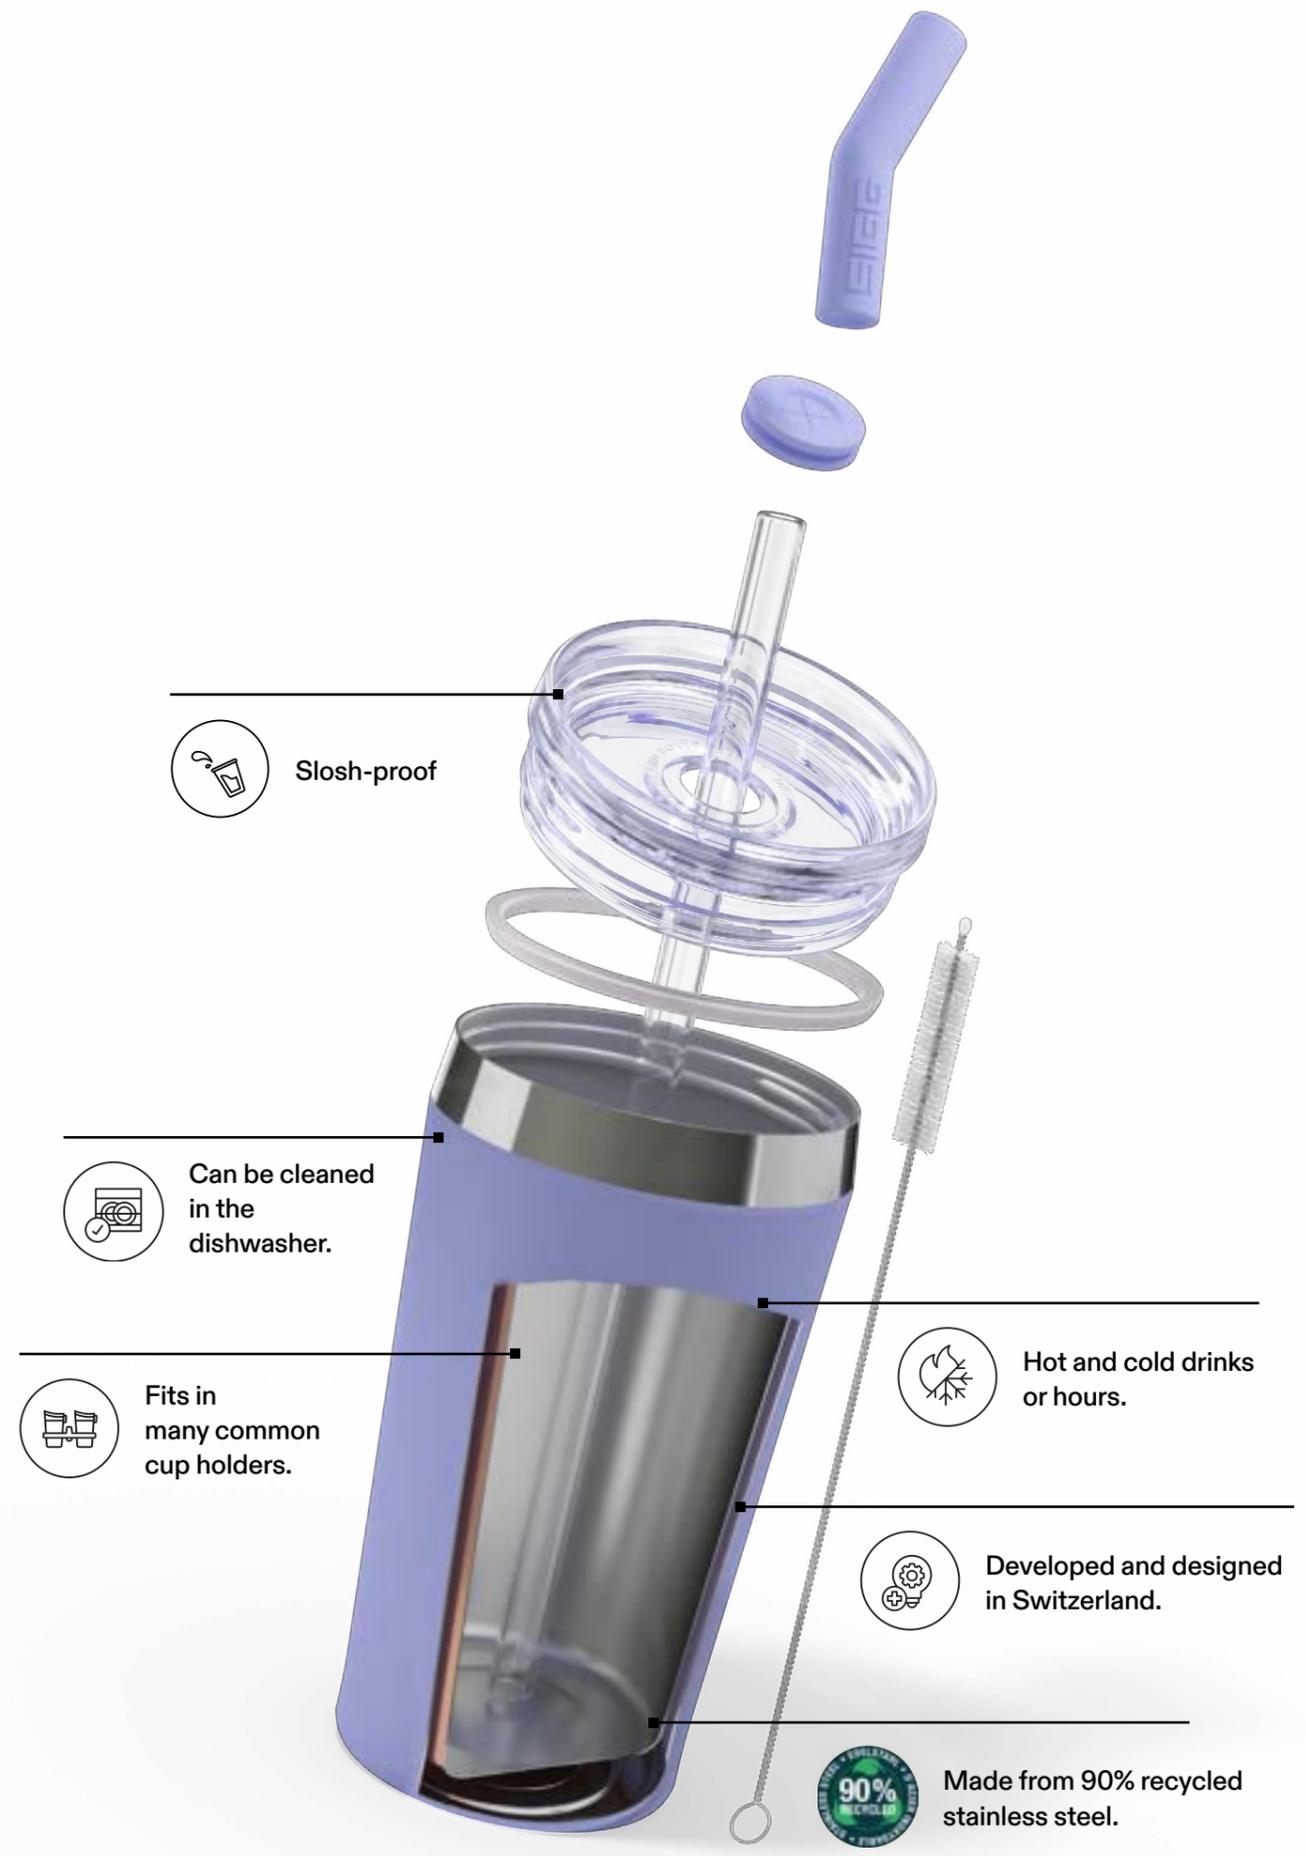

Every detail of this vacuum-insulated mug made from 18/8 stainless steel has been designed to make your drinking experience as easy and enjoyable as possible. It is equipped for every adventure and preserves the flavor of your drink so that you don't have to compromise on refreshment on the go. A copper-coated, double-walled construction keeps your iced tea, cocktail or smoothie at the optimum temperature and at the same time ensures that no condensation forms on the outside of your mug, thereby avoiding puddles on the table. Cold drinks stay chilled for up to 24 hours and hot drinks stay warm for up to 4 hours. The Helia mug also comes with a practical, durable glass straw and a corresponding cleaning brush, so you can dispense with disposable straws completely. You can also rely on the fact that, like all SIGG products, it has been designed with a special focus on sustainability and food safety. It is therefore both recyclable and free from harmful chemicals such as BPA.

STAINLESS STEEL

SIGG™

MIRACLE MUG

The Miracle Mug from SIGG:
leak-proof, taste-neutral and environmentally
friendly — ideal for hot drinks on the go.

STAINLESS STEEL

MIRACLE MUG

Pure enjoyment on the go. With the Miracle Mug from SIGG, hot drinks such as coffee or tea can be conveniently taken from home or filled at the café around the corner. With the high-quality mug made of 18/8 stainless steel, we are taking a stand against disposable cups and making it a must-have companion with no compromises. With the integrated "Push to open" mechanism, liquid only escapes when the button on the top is pressed. As soon as the button is released, the mouthpiece closes again immediately. This makes the mug leak-proof. Not a drop of liquid escapes even if it tips over. In addition, the top is made of high-quality Tritan™ and the mouthpiece is taste-neutral. The patented drinking system impresses with its easy cleaning. The top can be unscrewed and taken apart in one easy step. The wider opening of the stainless steel body also makes it easy to clean the inside. The Miracle Mug is free of harmful pollutants and recyclable.

SIGG™

TRAVEL MUG

The SIGG Travel Mug made of vacuum-insulated 18/8 stainless steel keeps drinks hot for up to 2 hours and cool for 14 hours, making it ideal for adventures.

STAINLESS STEEL

TRAVEL MUG

With the Travel Mug, you have a firm grip on your beverage of choice. No matter what comes your way, take a hot, invigorating sip or keep a cool head with your favorite refreshment. The vacuum-insulated mug made of 18/8 PCR stainless steel keeps coffee or tea hot for 2 hours and cold drinks cool for up to 14 hours. The transparent Tritan™ top provides additional insulation with a sealing ring and protects your drink from insects and falling leaves, as well as from spills when the going gets rough. The mouthpiece is always pleasantly soft on the lips thanks to its particularly smooth surface, ensuring a perfect drinking experience. The specially designed stainless steel handle also makes a noticeable difference. Durable and robust, it sits amazingly well in the hand and also functions as a hook, so you can attach your Travel Mug to your rucksack with a carabiner. Like all SIGG products, the Travel Mug is a strong piece of Swiss design, developed for maximum functionality and comfort, free of harmful pollutants and outdoor-tested. This mug is made for adventure. Take it with you.

TRAVEL CUP

Ready for any adventure — Travel Cups made from recycled stainless steel are durable, stackable and perfect for on the go.

STAINLESS STEEL

TRAVEL CUP SET

Travel Cups ensure you are ready for any expedition — be it camping, hiking or a relaxed outdoor picnic. Enjoy your favorite drinks no matter where you are. The cups, made from 90 percent post-consumer recycled stainless steel, preserve the natural taste of your drink and ensure an authentic drinking experience. They are comfortable to hold and can be stacked so that they hardly take up any space in your luggage. Thanks to the durable, unbreakable single-walled construction, the Travel Cups can withstand any weather and any situation and are a perfect alternative to disposable cups — for many years to come. Like all SIGG products, they combine Swiss design with maximum functionality. Their natural look in subtle colors makes them timeless classics. A genuine piece of Swiss design, made for your next adventure.

SIGG™

MOVE MY PLANET™

The lightweight water bottle can be used one-handed, offering perfect grip and easy handling, ideal for a fast-forward lifestyle.

ALUMINIUM

MOVE MYPLANET™

Are you in fast-forward mode? Do you want to drink water at the same time? The extremely light bottle can be used with just one hand, so you can keep a firm grip on your handlebars. The bottle's tapered middle also looks and feels great: It provides the perfect hold. The bottle is easy to open and close using the mouth. The Move MyPlanet bottle body is made in Switzerland from high-quality, 100 percent recycled aluminium and is ClimatePartner-certified as well as BPA-free and free of harmful pollutants such as estrogen-active substances and phthalates. Did you know? After just the fifth use, bottles made from recycled aluminium have a better carbon footprint than PET bottles.* The use of recycled materials and the sustainability-inspired designs underline the importance of climate protection

SWISS CULTURE

Whether as a tribute to our roots, as a gift for fans of Switzerland or as a loyal companion on trips around the globe — the Swiss Culture bottles bring a piece of Switzerland into your everyday life. The high-quality drinking bottles feature classic Swiss symbols such as the iconic cross or cows. Made from 100 percent recycled aluminum and “Made in Switzerland,” they stand for top quality, longevity and sustainable design. A real statement for all those who love Switzerland.

KBT

WMB ONE

The WMB ONE made of recycled aluminium combines design and functionality. It is free of harmful substances, leak-proof and lightweight, making it ideal for any journey.

WMB ONE

How do you imagine the perfect bottle for your next trip? It must be lightweight, easy to carry and made of high-quality, durable material. Our new WMB ONE made of recyclable aluminium was born out of a passion for design, functionality and outdoor adventure. The material is free of harmful substances such as BPA, estrogen-like substances and phthalates – for a safer drinking experience! The bottle is leak-proof, even with carbonated beverages and when held upside down. In addition, the innovative ONE Top lid makes the bottle particularly practical: It can be carried, opened, drunk from, closed and secured conveniently with one hand. Ideal as a lightweight companion in everyday life and for any activity.

WMB SPORTS

The elegant sports bottle with its ergonomic design and non-slip surface is the perfect training partner: light, stable and free of harmful substances.

WMB SPORTS

The elegant yet functional design of this sports bottle is a guaranteed head-turner — wherever your active life takes you! Its particularly ergonomic shape and non-slip surface make it the ideal training partner everywhere you go. The high-quality, reusable aluminium bottle is extremely light and stable and fits into all standard bicycle bottle cages. It combines the 3-stage sports top with the WMB adapter. This makes cleaning and filling even easier — even ice cubes fit into this SIGG! The material is free of harmful pollutants, such as estrogen-active substances and phthalates—for safer, carefree drinking pleasure. This SIGG product is ClimatePartner-certified.

PULSAR & PULSAR THERM

The Pulsar bottle impresses with its leak-proof valve solution, ergonomic design and easy handling for active athletes.

POLYPROPYLENE

PULSAR & PULSAR THERM

No leakage — even when the valve is open, you can rely on the Pulsar not leaking. The bottle is easy to open and close with your mouth. Thanks to the bottle's tapered middle, the Pulsar fits into your hand perfectly, and a gentle squeeze of the soft bottle is enough for ideal hydration. Not only is this great for cycling, but also for spinning, the gym and many other sporting activities. Of course, the Pulsar is also practical in other ways. It is easy to fill with liquid, ice and powder and perfect for mixing isotonic drinks. The reason for all these advantages? This bottle was developed with champions from the Swiss national cycling team. The result: durable, resistant materials in combination with a progressive, minimalist design. What's also brilliant is that the Pulsar is free from BPA and phthalates and made to last for many years.

Thanks to its double-walled construction, the Pulsar Therm keeps drinks nice and cool in summer, while in winter the insulated bike bottle protects liquids from cooling down or freezing quickly.

LUMO LUNCHBOX L

For all those who don't want to miss out on good food while on the go: The LUMO Lunchbox transports your meal safely and in style — Swiss design for your everyday life.

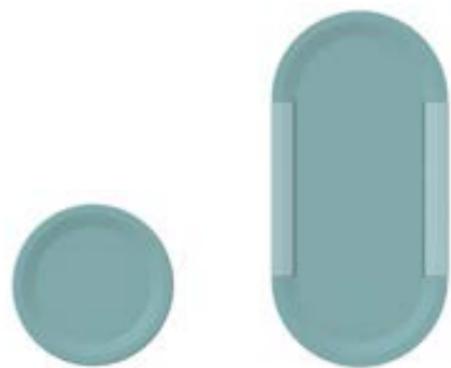

POLYPROPYLENE

LUMO LUNCHBOX L

Healthy food, cleverly prepared – with LUMO, meal prep is child’s play. Whether it’s a crisp salad, sandwich or pasta to go: The LUMO Lunchbox from SIGG transports your food reliably and stylishly throughout the day. Made from recyclable polypropylene, it is durable, lightweight and a practical alternative to heavy glass containers – perfect for carrying in your handbag or briefcase. The material is BPA-free and food-safe, so you can always enjoy your food without any worries. Want to heat up your dish? No problem – LUMO can go straight into the microwave without the hassle of transferring food to a plate. A separator ensures that snacks and the main meal do not mix. There is also a round, leak-proof snack box, which is ideal for yogurt, dips or sauces. After use, everything can simply go in the dishwasher. A perfect combination – functional, stylish and coordinated. In colors that perfectly match SIGG bottles. Swiss design. Made in Germany.

TRITAN™

SIGG™

TOTAL CLEAR ONE

The Total Clear One MyPlanet bottle made from Tritan™ Renew is durable, scratch-resistant and sustainable, with a practical ONE top for everyday use.

TRITAN™ RENEW

TOTAL CLEAR ONE

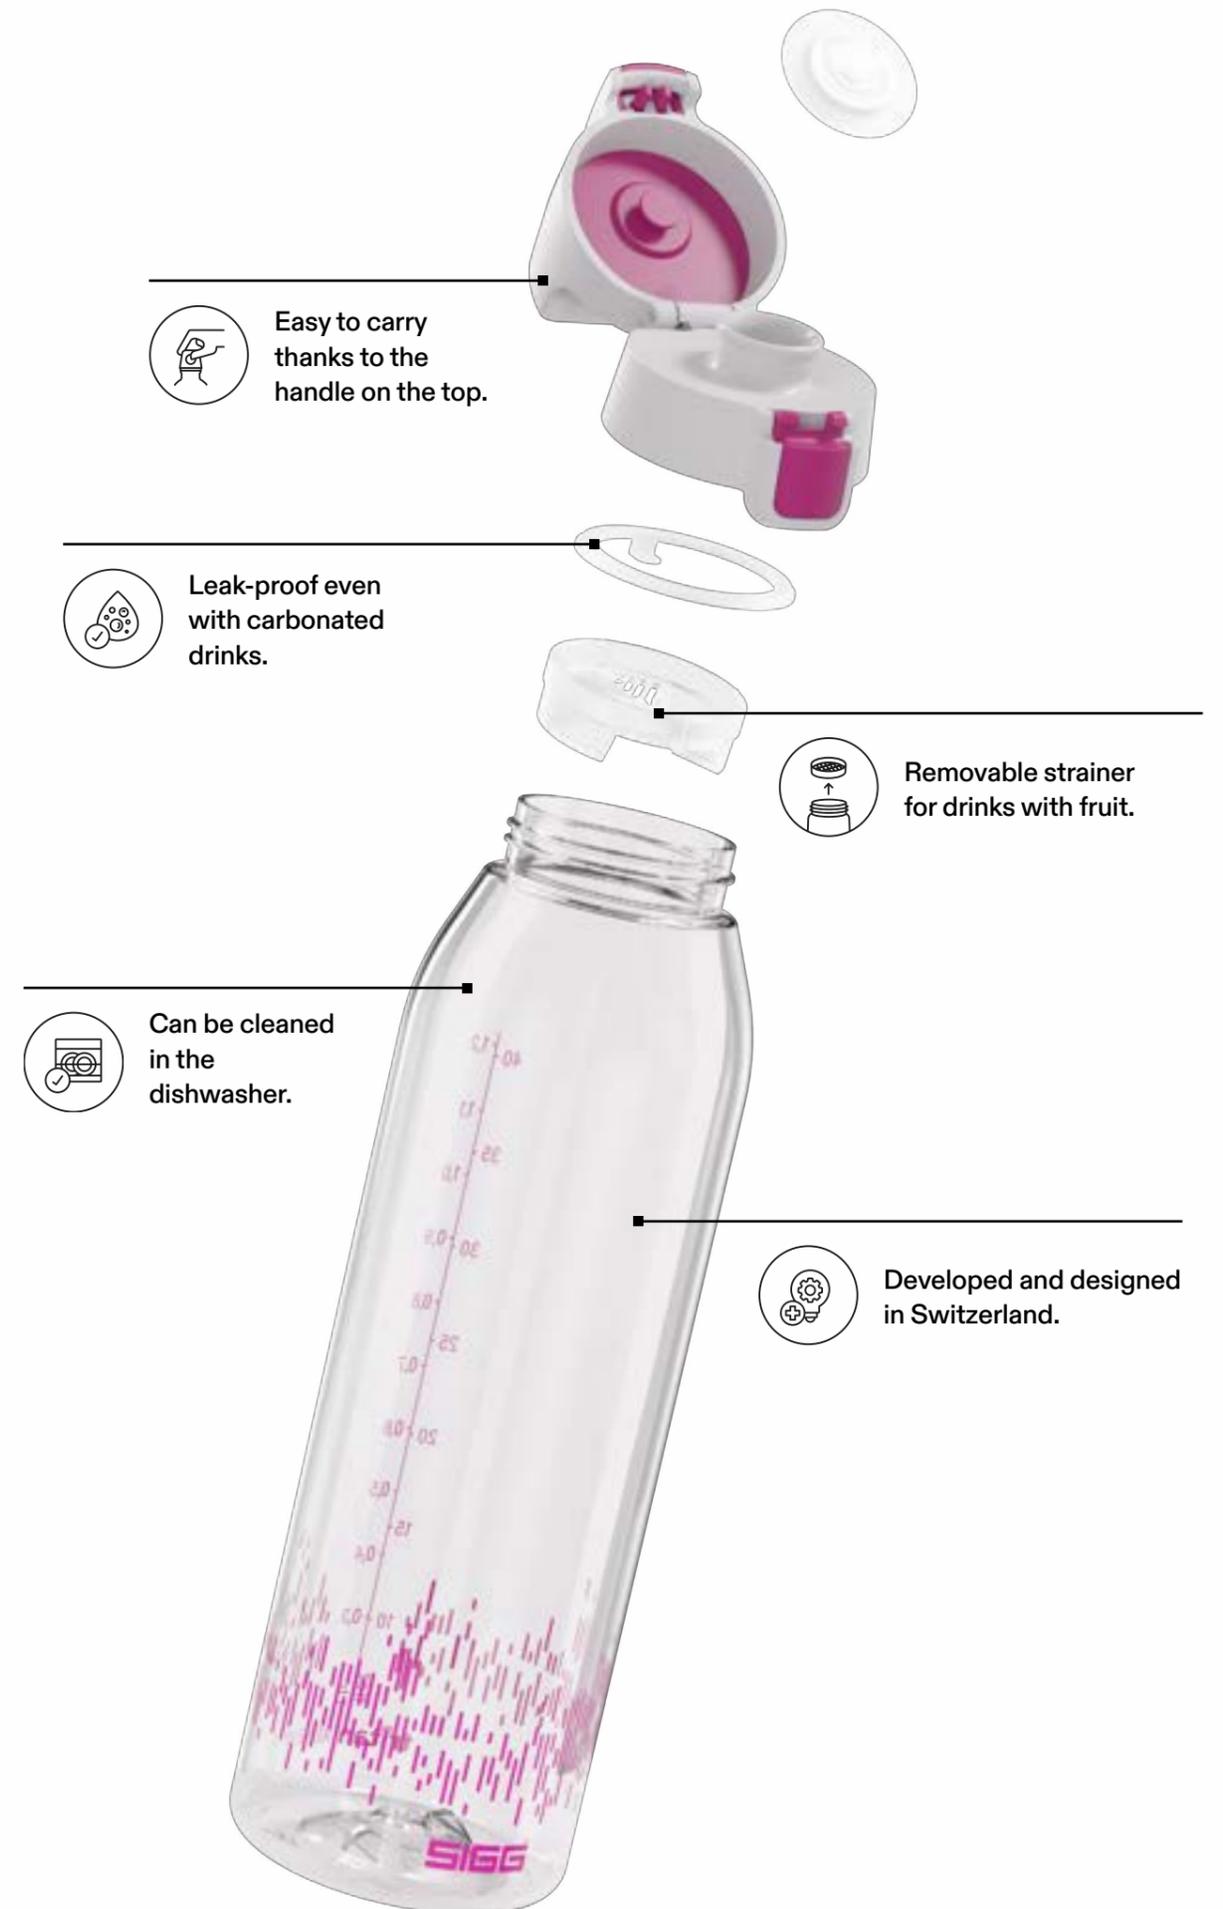

The Total Clear ONE MyPlanet is here to stay. In the size 0.75, it impresses with scratch-resistant clarity, durable longevity and a practical ONE (one-hand) top. When manufacturing its products, SIGG ensures that plastic amounting to 50 percent of the weight of the bottle is recycled in new consumer goods. Step by step to recycling bliss with Tritan™ Renew, a new technology that is based on molecular instead of mechanical recycling and makes plastic go round in circles instead of reaching a dead end. This saves on non-reusable waste and greenhouse gas emissions and represents an investment in a sustainable future thanks to a smaller carbon footprint.

KIDS

SIGG™

SHIELD THERM ONE

The children's drinking bottle is free from harmful substances, keeps drinks cold for 36 hours, is also suitable for hot and carbonated drinks, and is leak-proof and easy to use with one hand.

STAINLESS STEEL

SHIELD THERM ONE

We present: the coolest drinking bottles for kids on the market! With its innovative ONE Top, the Shield Therm ONE children's drinking bottle is easy to open and close and is sturdy enough to withstand a fall without leaking. The vacuum-insulated, copper-coated double-walled construction keeps your child's favorite drinks cold for an incredible 36 hours. It doesn't get much cooler than that. Naturally, its insulating properties also make it perfectly suitable for hot drinks. When it comes to looks, every child has their own taste, so we have provided a large selection of fun and colorful designs. The Shield Therm ONE children's drinking bottle is made of 90 percent post-consumer recycled stainless steel and is the environmentally friendly alternative to disposable plastic containers. And like all SIGG drinking bottles, it is completely BPA-free and meets the strict EU standards for food safety to protect your child's health. With this bottle, your child always has a cool drink to hand – or a warm one if desired.

Discover colorful kids' mugs made of stainless steel:
BPA-free, recyclable, easy to clean and ideal
for children's hands!

STAINLESS STEEL

KIDS CUP SET & KIDS STRAW CUP

The colorful Kids Straw Cups with a removable silicone top are the perfect choice for little explorers who like to be active at home. Simply fill with water, fruit-flavored syrups or other cold drinks, put on the top with its straw and off they go! The soft silicone mouthpiece with rounded edges ensures a pleasant drinking experience and motivates children to drink more. Tipped over during play? No problem! The top prevents water from sloshing out – so annoying puddles are a thing of the past! The robust cups made from 90 percent recycled stainless steel are a sustainable and durable alternative to plastic. They are BPA-free and taste-neutral. Thanks to the removable top, the Kids Straw Cups are easy to clean in the dishwasher or with a brush and sponge. Another plus point: The cups are stackable and so save space in the kitchen cupboard. The top is also compatible with all SIGG Kids Cups.

LUMO KIDS LUNCHBOX

Healthy eating should also be fun on the go:
The LUMO Kids Lunchbox accompanies little explorers
throughout the day — colorful, durable and perfectly
designed for children's hands.

POLYPROPYLENE

LUMO KIDS LUNCHBOX

Food should taste as good on the go as it does at home: The LUMO Kids Lunchbox makes it easy to take sandwiches, fruit and small snacks to school, nursery or the playground. The lunchbox is made for children's hands — it is easy to open and so durable that it can be used every day. Its colorful designs bring joy to every break and go perfectly with VIVA drinking bottles in the same look. Thanks to its compact shape, the lunchbox fits easily into any school bag. Made from recyclable polypropylene, LUMO is BPA-free, food-safe and particularly easy to clean — for parents who value quality and appreciate easy cleaning. An integrated bowl with two compartments ensures that snacks and the main meal do not mix. If the food is to be enjoyed warm, the box can go straight into the microwave — without the need for decanting. Simply put it in the dishwasher after use. For little extras, there is also the separately available, leak-proof snack box — ideal for yogurt, dips or sauces. Swiss design. Made in Germany.

SIGG™

GERMAN FOOTBALL ASSOCIATION

The right equipment is crucial for top performance. We present the German Football Association (DFB) drinking bottle collection — a must for all fans hungry for success. It consists of durable, leak-proof and easy-to-clean drinking bottles. All products are officially licensed, which guarantees the authenticity and quality of these items. A must-have product for all DFB fans. Not only as a sign of passion and pride in the team, but also as a sporty companion on the pitch.

SPARE PARTS & CLEANING

For cleaning, we recommend the SIGG cleaning brush and our cleaning tablets. After washing, dry the bottle with the opening facing downward on the drying rack and store it open. Tip: Empty daily and clean — for long-lasting freshness.
